

Table of Contents: Volume 13 (1997)

Number 1

A Traffic Generator for Testing Communication Systems: Presentation, Implementation and Performance.	<i>Nedo Celandroni, Erina Ferro, and Francesco Potorti</i>	5
Implementing a Probabilistic Clock Synchronization Algorithm	<i>Gianluigi Alari and Augusto Ciuffoletti</i>	25
Threaded Prefetching: A New Instruction Memory Hierarchy for Real-Time Systems	<i>Minsuk Lee, Sang Lyul Min, Heonshik Shin, Chong Sang Kim, and Chang Yun Park</i>	47
Computing Maximum Task Execution Times - A Graph-Based Approach.	<i>Peter P. Puschner and Anton V. Schedl</i>	67
Contributing Authors		93

Number 2

The Non-Optimality of the Monotonic Priority Assignments for Hard Real-Time Offset Free Systems	<i>Joël Goossens and R. Devillers</i>	107
Presto—A System Environment for Mission-Critical Multimedia Applications ...	<i>Jiandong Huang, Deepak Kenchammana-Hosekote, Mukul Agrawal, and James Richardson</i>	127
On Using Real-Time Static Locking Protocols for Distributed Real-Time Databases	<i>Kam-Yiu Lam, Sheung-Lun Hung, and Sang H. Son</i>	141
A Heuristic Approach to the Multitask-Multiprocessor Assignment Problem using the Empty-Slots Method and Rate Monotonic Scheduling	<i>J. Santos, E. Ferro, J. Orozco, and R. Cayssials</i>	167
Contributing Authors		201

Number 3

Special Issue on Safety-Critical Systems

Guest Editors: Bernd Krämer and Norbert Völker

Editorial	<i>Bernd Krämer</i>	217
A Systematic Approach to the Petri Net Based Specification of Concurrent Systems	<i>Antonino Mazzeo, Nicola Mazzocca, Stefano Russo and Valeria Vittorini</i>	219
A Highly Dependable Computing Architecture for Safety-Critical Control Applications	<i>Bernd Krämer and Norbert Völker</i>	237
The ProCoS Approach to Correct Systems	<i>Hans Langmaack</i>	253
Building Large, Complex, Distributed Safety-Critical Operating Systems	<i>Horst F. Wedde and Jon A. Lind</i>	277
Contributing Authors		303
